Health Hackers

Guarding minds, coding hearts.

AI Healthcare Chatbot for mental health support.

Team: Health Hackers

Problem

Limited access to timely mental health support, stigma, and lack of scalable screening tools.

Solution

An empathetic AI chatbot that performs mood checks, offers coping exercises, and escalates crises to helplines.

Architecture

Frontend (React) -> Backend (FastAPI) -> Safety Pipeline -> LLM (OpenAI) -> Logging & Dashboard

Safety & Ethics

Consent, no diagnosis, crisis escalation, clinician oversight, and encrypted logs.

Demo

Show consent -> normal chat -> mood check -> crisis escalation.
